

Woodland Community College iSLO Survey Results Summer 2017

Overview

The institutional student learning outcomes survey was administered in the summer of 2017. The survey was piloted with students who had petitioned and successfully graduated from WCC in the spring of 2017. Prior to the survey being implemented, the SLO committee at WCC reviewed the instrument. The committee provided suggestions on the wording of questions and instrument length. This was instrumental in ensuring questions truly captured the eight institutional student learning outcomes.

Once the survey was ready for administration, an email invitation was sent to all students who petitioned to graduate and graduated. A total of 22 students fully completed the survey. In the upcoming 2018-2019 academic school year institutional student learning outcomes will be measured for each incoming student at entry, once during progress and upon graduation.

Highlights

- Students identified an increased sensitivity to diverse cultures and various populations.
- Students identified increased awareness of issues affecting different areas of the world.
- Students identified and increased ability to apply basic scientific principles.
-

Attention needed

- Technology use and technology skill development.
- Data driven decision-making.

Next Steps

- Administer survey to students who graduated in Fall 2017 (March 2018)
- Administer survey to students who petition to graduate in Spring 2018
- Implement entry survey to incoming students in Fall 2018

Woodland Community College iSLO Survey Results Summer 2017

	Completely agree	Mostly Agree	Slightly Agree	Slightly Disagree	Mostly Disagree	Completely Disagree
My communication skills have improved since becoming a student at WCC.	46%	37%	18%	0%	0%	0%
